**Aqua Smart Dust Eliminator- Eco 25** is a unique complex formulation of natural organic extracts, Glycols and Glucosides. This product utilises renewable resources.

This unique combination works to relieve the conditions causing fugitive dust and subsequent air pollution created by vehicle traffic, eliminating the dreadful impacts of this rogue dust on human health and safety, and immediately reducing the detrimental impacts of dust on the environment.

**AquaSmart Dust Eliminator – Eco 25** will provide superior and long lasting soil stabilizing and dust binding performance at any time of year. It is completely non-toxic, non-corrosive and environmentally friendly, resulting in safe and suitable application to all industrial, agricultural and public areas.

- Environmentally friendly, non-toxic and non-corrosive
- Immediately improves air quality for people, livestock, wildlife and pets
- Fully water soluble and can be applied with your existing / standard spray equipment
- Will have no adverse effect on adjacent vegetation or water bodies.
- Long lasting dependent on road construction. Harder clay based surfaces require infrequent applications.

## COMPOSITION

**AquaSmart Dust Eliminator – Eco 25** is a proprietary and environmentally friendly complex of natural organic plant extracts, non-ionic surfactants and inert ingredients.

## APPLICATION RATES

Standard mix is a 25% concentration ratio with 75% water mixed prior to application  
Standard application rate is 1.5 litres of mix per m<sup>2</sup> utilizing a pressurized spray-bar system

Climatic conditions, the nature of the road surface and traffic, will determine the frequency and dosage of Dust Eliminator- Eco 25. Please consult with your local representative for any proposed or required variations from standard usage rates, or application procedures.
