

AquaSmart®

AquaSmart 4D[®] Granular

Triple Action Granular Wetting Agent

Aids water penetration and retention for sportsturf, landscapes, gardens and lawns

- Reduces water surface tension, aids rewetting and improves drainage.
- Triple acting wetting agent also suitable for all potting mixes and soils.
- Long lasting effects after application can improve cation exchange capacity.
- Ready to use granular formulation for ease of application.
- Can improve the efficiency of fertilisers and crop protection products.
- Non toxic and environmentally safe.

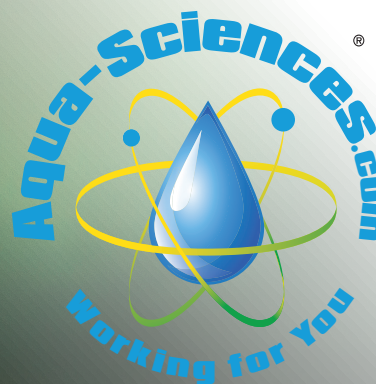

KEY FEATURES AND BENEFITS OF 4D GRANULAR

- An ideal water management tool in turf, landscapes, gardens and lawns.
- Controls dry patch in turf and improves water percolation in wet soils.
- Easy to use granular formulation which can be top dressed by spreader, or by hand.
- Provides immediate and long term response.
- Non-toxic to plants and environmentally safe.

HOW TO USE

- Greens surrounds and tees – top-dress at the rate of 1.5kg/100m² and reapply every 1-2 months.
- Fairways, sportsfields and lawns – top-dress at the rate of 2.0kg/100m² and reapply every 2-3 months.
- Landscapes – top-dress at the rate of 1.5-2.0kg/100m² and reapply every 3 months.
- Potting mixes – Add 1 to 2% to mix by volume.
- It is preferable to apply early in the season before any potential for drought stress arises.
